

# Teva to sponsor cancer research

## DR REBECCA GARDINER TO UNDERTAKE RESEARCH AT UCC

PHARMACEUTICAL company Teva is to sponsor a three-year research fellowship at the **Cork Cancer Research centre**.

Dr Rebecca Gardiner was chosen from 50 applications for the fellowship, and will be supported in her research to undertake research at UCC and Copenhagen University Hospital.

The **Cork Cancer Research Centre** is a collaboration research centre involving the Cork University Hospitals and University College Cork, and is now internationally recognised for its ground breaking cancer research.

Dr Declan Soden, General Manager and Principal Investigator of **CCRC** said the fellowship allows the centre to continue its vital research, and will allow it to work further with both Cork University Hospital and Copenhagen University Hospital.

"The partnership with Teva who share our vision for a future free of cancer will also aid in continuing our ground breaking research and we are delighted to have Rebecca join the team at **CCRC**," he said.

Teva is the world's leading generic drug maker, and has sites in Waterford and Dundalk.

At the **Cork Cancer Research Centre (CCRC)** were, back to front, Dr Declan Sodden, General Manager and Principal Investigator at the **CCRC**; Dr Brian Bird, Consultant Oncologist, Bon Secours Hospital and **CCRC** collaborator; Eamon O'Keeffe, TEVA, with Rebecca Gardiner, fellowship recipient and medic.
